

UltraStudio 3D

Portable Thunderbolt™ based 3D capture and playback for SDI, HDMI and analog

Uncompressed editing in HD, 2K and 3D on your laptop!

Introducing UltraStudio 3D, the world's most innovative video capture and playback device using Intel's new, lightning fast Thunderbolt™ technology! UltraStudio 3D is compact, portable and affordable, yet has high performance for SD, HD or 2K capture and playback that Hollywood film, broadcast television, and post production markets demand. UltraStudio 3D even supports two streams of full resolution video up to 1080p HD for new stereoscopic 3D workflows! Only \$995

The Power of Thunderbolt™

Built on revolutionary Thunderbolt™ technology, UltraStudio 3D has a blazingly fast 10 Gb/s connection that's up to 20 times faster than USB 2.0. That's enough bandwidth for 2K RGB capture and playback!

Thunderbolt also brings low latency and highly accurate time synchronization, so UltraStudio 3D is perfect for demanding stereoscopic 3D workflows. Now you can get all the workstation class performance you love, conveniently on your notebook!

Amazing 3D Workflow!

UltraStudio 3D includes high quality HDMI 1.4a and dual HD-SDI connections for full resolution frame packed 3D capture and playback. Work in side-by-side, line-by-line, and top and bottom formats, even with previous generation 3D devices. Blackmagic Design's free Media Express software allows advanced dual stream 3D workflows by capturing left and right eye to separate QuickTime or DPX files for a complete 3D solution!

International Power Supply

UltraStudio 3D includes a universal power supply complete with a set of international socket adapters for all countries. Now you can take your editing suite with you anywhere without the need to purchase third party adapters.

Compatible with Everything!

With UltraStudio 3D you get more third party software compatibility! Seamlessly edit on your favorite NLE software such as Final Cut Pro and Premiere Pro. For compositing and broadcast design, UltraStudio 3D works with After Effects, Nuke, and Photoshop. [Read more >](#)

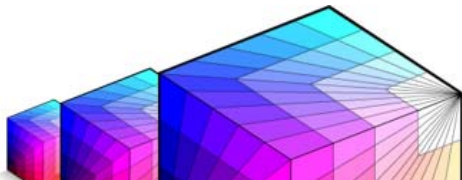

World's Highest Quality Connections

UltraStudio 3D takes advantage of the fastest data pipe available via a compact Thunderbolt™ port. With high quality low jitter SDI connections and instant switching between SD, HD and 2K, UltraStudio 3D is the perfect capture and playback device. [Read more >](#)

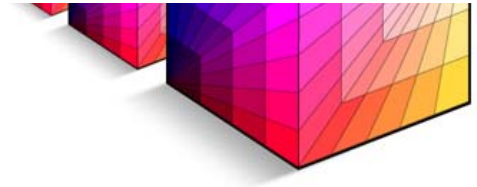

UltraStudio 3D. Simply Stunning Design

Machined from a solid piece of aluminium, UltraStudio 3D is an attractive, rugged device that's packed with features previously only available with a workstation. It's perfect for those on the go as an extremely portable companion to your camera, notebook and favorite NLE package. Imagine keying graphics in real time in live video environments or connecting high performance storage, a full HD plasma and UltraStudio 3D to your MacBook Pro to handle just about all of your post and feature film workflows!

Unmatched Quality

Now you can handle any job that comes through your door, from TVC to 2K feature films, because UltraStudio 3D supports uncompressed YUV 4:2:2 and RGB 4:4:4 workflows up to full resolution 2K! Since all captured images are a pixel-for-pixel clone of the source, without any generational loss or

damaging compression, you're working at the highest quality possible. Get the sharpest green screens, cleanest compositions, superior color correction and more! With mature drivers, award winning Media Express software, and sophisticated SDK included, UltraStudio 3D is an unparalleled solution.
